

## Product information

# Submersible motor Type TMP

## Submersible motors Type TMP

Special motors designed and produced from FFD in close coordination with and especially for our customers. From the first idea to the final production. Everything from one source!

### Nominal data

| Type       | Nominal output | Nominal speed | Nominal voltage | Nominal current | Nominal frequency | power factor | Nominal torque | Degree of protection | Weight | Insulation class |
|------------|----------------|---------------|-----------------|-----------------|-------------------|--------------|----------------|----------------------|--------|------------------|
| -          | kW             | rpm           | V               | A               | Hz                | -            | Nm             | -                    | kg     | -                |
| TMP 5,5/4  | 5,5            | 1445          | 400             | 11,8            | 50                | 0,79         | 36,4           | IP68                 | 97,5   | F                |
| TMP 7,5/4  | 7,5            | 1450          | 400             | 15,6            | 50                | 0,81         | 49,4           | IP68                 | 107    | F                |
| TMP 11/4   | 11             | 1400          | 400             | 22,0            | 50                | 0,84         | 75,0           | IP68                 | 130    | F                |
| TMP 15/4   | 15             | 1450          | 400             | 28,6            | 50                | 0,86         | 98,8           | IP68                 | 153    | F                |
| TMP 18,5/4 | 18,5           | 1400          | 400             | 34,6            | 50                | 0,87         | 126            | IP68                 | 161,5  | F                |
| TMP 22/4   | 22             | 1445          | 400             | 41,7            | 50                | 0,84         | 145            | IP68                 | 163    | H                |

Our TMP submersible motors are produced in 2 different versions of the shaft (short and long).

### Area of application for pump drive

Agriculture, liquid manure, mobil or fixed pump station, biogas wastewater, sewage plants, faecal sludge

## OUR SOLUTION FOR YOUR POWER!
